Notes on Weighting

The dataset includes weights that allow researchers to match Census distributions for Puerto Rico, based on data from the 2023 American Community Survey. The weighting variable (wgt_pr) is designed to weight the sample so that it is representative within Puerto Rico on the following demographic characteristics:

- Age by gender: Male 18-34
Male 35-54
Male 55+
Female 18-34
Female 35-54
Female 55+
- Ethnicity: Hispanic (alone or in combination)
Not Hispanic
- Education: Some college (including Associate's degree) or less
College graduate (Bachelor's degree) or more

Note that the weighting is intended to produce a reliable representation of the population of Puerto Rico as a whole. However, breakdowns of sub-populations will not necessarily be representative.

No additional weighting was used to account for non-response bias.
